FLY TO SUCCESS

# 38 YEARS OF RACING

For over three decades, we have been creating innovative, high-tech products.

Vola is a software company, developing timing and video software.

It's also a whole hardware dimension, with the resale of video panels and hardware such as: stopwatches, cells, gates, wireless links, start clocks, video finish cameras, video panels, etc. Here is a non-exhaustive list of Vola's software and hardware capabilities:

- time and manage competition results,
- create video inserts,
- broadcast live,
- generate data and images,
- drive an LED panel,
- etc.

Our aim is to provide simple, high-quality solutions, to manage your shopping from A to Z

**User manuals**  
 Go to [vola.fr](http://vola.fr), in the Knowledge Base section to find out more.

  
**Software support**  
 Fill in the online form on « [www.vola.fr/support/report.php](http://www.vola.fr/support/report.php) » for all requests for assistance.

- TECHNICAL LISTING**
- Race formats: show jumping, eventing, dressage, eventing.
  - Import/Export of competitions and results from FEI, FFE, FFE-SIF federations.
  - Filter processing for customizable rankings.
  - Support for stopwatches and decoders: CP545, MyLaps X2, Race Results, TIMY, etc.
  - Simple, powerful and flexible timing with event management for all scales and repeats.
  - Up to 2 intermediates.
  - Penalty calculation.
  - Scoreboard support: Vola CA8-15, Alge DLine, Omega, Microgate, etc.
  - Fully customizable live results publication on TV and Internet.
  - Fully customizable scoreboard display.
  - Championship management with instant calculations.
  - Start list preparation with estimated transfer time between events.
  - Customizable editions: fonts, sizes, colors, logos, columns, etc.
  - Print master lists, start lists, rankings, challenges and championships.
  - Network secretarial management with timing.
  - Time several tracks in parallel with the multi-course mode.
  - With the Entry mode, riders can enter via touch-screen terminals.
  - Manage invoicing and winnings distribution.

### CONFIGURATION EXAMPLE

- The link between the installations will be made by wifi bridges.
- 4 careers to be filmed = 4 cameramen
- 1 person is needed in a timekeeping booth to manage the timing and video.
- 2 giant panels
- 2 entry terminals
- 1 TV display

### SENDING THE DATA

**JURY STAND**  
 Timer / Headset  
 1 PC with Display-Equestre-Pro for the speaker  
 1 PC to manage the timing and the live video generator with Video-Equestre-Pro  
 1 operator to film the rider during the race

**Publish-Equestre-Pro:**  
 Web platform for viewing and recording live texts and video clips.

**WebTV:**  
 Internet television channel, website of editorial content that the user can access by streaming.

**Clips-Pro :**  
 Recording, picture-in-picture, video trimming and sending the final edited video to live Publish

**SECRETARIAT & BILLING**  
 1 PC with Equestre-Pro

**Commitment terminal**  
 1 PC with Equestre-Pro

Centralise the results of several careers, simultaneously, on the same platform.

**LEGEND**  
 Texts in brown: These products are intended to manage the timing of the race.  
 Texts in blue: These products are intended to manage the video system of the race.

# ZOOM ON Equestre-Pro

**Equestre-Pro**  
 Suite master timing software

Equestre-Pro is a professional timing and calculation software developed for equestrian competitions such as show jumping, dressage, eventing and hunter. It provides secretarial services, timing, results processing and editing. The Equestre-Pro suite can be adapted to your national and international competitions.

**Disciplines**  
 Show jumping, Dressage, Eventing, Hunter .

**Chrono compatibility**  
 Alge, BeChronized, Chronelec, FDS Timing, Microgate, Mylaps, myWER, Omega, Race Results, Summit, Tag Heuer, TMR, Vola.

**SCOREBOARD compatibility**  
 Adaptive, Alge, Microgate, Omega, Radiocom, Tag Heuer, Timetronics, Vola. + made-to-measure

**Specifications**  
 > PC with Windows 8/10/11.  
 > Screen resolution: 1920x1080 mini.  
 > USB port for protection key.

### FEATURES

- > Simple, powerful and flexible timing and calculations with event management for all scales and repeats.
- > Advanced communication with stopwatches (channel management, downloading).
- > Start / Finish / Second stage support / 2 intermediates / Time stop (jury pear).
- > Up to 6 careers simultaneously.
- > 2 simultaneous scoreboards.
- > Results displayed live on TV and Internet.
- > Fully customizable scoreboard display.
- > Championship management with instant calculations.
- > Start list preparation with estimated transfer time between events.
- > Print master lists, start lists, rankings, challenges and championships.
- > Import and export of competitions and results from country federations and the FEI.

### SINGLE-POST MODE

- > Ideal for national competitions.
- > Entry management.
- > Timing management.
- > Print or export editions in PDF format.

### MULTI-STATION MODE

- > With the FEI: manage the secretariat in network with timing.
- > Time several tracks in parallel with the multi-course mode.
- > With the FEI: riders can sign up via touch-screen terminals.
- > With the FEI: manage invoicing and distribution of winnings.

ZOOM ON  
**Equestre-Pro**  
 Secretariat

Suite Equestre-Pro's multi-station «Secretariat» function allows a number of adaptations for national and FEI events.

**NATIONAL EVENTS**

- > Entry management
  - > Horse and rider changes
  - > Web service system
- With internet: direct connection to the FFE web service.

**FEI EVENTS**

- > Master List management
- Import of entries from FEI Entries, with accessible updates
- > Assigning of entry numbers
- > Editing of all Master Lists
- > Editing of passport labels
- > Edition of start lists with publication on Publish-Equestre-Pro
- > Sending the list to the timekeeper's post and to the timekeepers
- > Edition of results
- > Export to FEI format

ZOOM ON  
**Equestre-Pro**  
 Invoicing

Equestre-Pro Suite's multi-position «Invoicing» function enables you to manage account statements and distribute earnings.

**NATIONAL AND FEI EVENTS**

- > A mode of operation that appeals to riders from the country in which the competition/race is held, as well as to riders of other nationalities.
- > Includes entry fees and consumables
- > Deduction from riders' winnings

ZOOM SUR  
**Equestre-Pro**  
 Commitment

Suite Equestre-Pro's multi-station «Engagement» feature enables riders to sign up via touch-screen terminals, freeing up your secretarial time and freeing up the operator's time.

**FEI EVENTS**

- > Takes into account the parameters of each event
  - Limited number of entries per rider, per horse, per day, per age and per white list
  - > Regroups all your competition labels on a single screen
- At a glance, the rider can enter all his horses in the various authorized events.

ZOOM ON  
*Display*

With Display-Equestre-Pro, you can broadcast start lists, rankings and the next competitors to start live over a video network. Customize the entire interface to suit your image by managing columns, colors and sizes.

FEATURES

- > View live rankings updates.
- > Choose the layout of your rankings.
- > Resolution, colors, font sizes.
- > Rotating or fixed page mode depending on the number of classifieds.
- > Indispensable tool for your announcer.
- > Ideal for paddocks, grandstands, lounges and restaurants.

OFFSET DISPLAY

You can run Display-Equestre-Pro on the same PC as Equestre-Pro, or operate it on a remote computer using an RJ45 link or a Wifi bridge.

    - Display-Equestre-Pro
    - Publish-Equestre-Pro
    - Video-Equestre-Pro
  - Independent software
  - Scoreboard-Pro
- Output options  
WebTV / HDMI / Blackbox  
Clips-Pro

# ZOOM ON Publish

**Publish-Equestre-Pro**  
Centralize data for the world to discover

Administrator interface:  
track the progress of your races  
with statistics!

Example of a live race

Publish is a software program that allows you to send live information about your race over the Internet.

Une page web est dédiée pour votre structure.

On your web space, you'll be able to view live races and the PDF documents you've sent (start list, results, other information, etc.). What's more, Publish has the advantage of memorizing the races you've run. This means you can keep a record of your results, which can be viewed on subsequent days, at committee meetings, family get-togethers or when checking results with friends. Publish is the basis for WebTV and clip operation.

All these functions are designed to integrate ergonomically into the environment: Publish can be viewed just as easily on a smartphone as on a computer.

On the management side, you have an administrator's area that lets you delete races, as well as view your web page traffic. You can see the number of pages viewed, the number of documents, clips viewed and downloaded. Properly integrating Publish access into your website will enable you to drive traffic to your site and add value to your services. The standard website design is included with the subscription. If you'd like to customize the site to your liking, you can access CSS from your administrator area (at no extra cost). Please contact a competent person to modify your CSS.

- Publish's structure automatically adapts to your needs (live, WebTV, PDF publications) and your number of races.
- PUBLISH RATES**  
Publish works on an annual subscription basis.  
Subscribing gives you access to your web page.
- WEBTV OPTION**  
WebTV is an annual subscription feature of Vidéo-Equestre-Pro.
- CLIPS-PRO**  
Operates on a subscription basis, then invoiced at the end of each month according to the number of clips produced.

In the Video Manager interface, connect inputs, outputs and media, thanks to the virtual cabling system!

7 camera inputs  
Your choice: IP, HDMI, SDI, USB

4 outputs available

7 media usable

Video Control  
Once you've wired up your video control room, you'll discover your working interface for viewing all cameras, media and outputs.

## FOCUS ON THE SYSTEM

# Vidéo

### Video-Equestre-Pro

Create live streams, clips & animations for up to 7 cameras

Video-Equestre-Pro is a multi-functional software package that replaces a real professional video control room.

On the input side, it is capable of :

- > Capture and record up to 7 USB, IP, HDMI or SDI cameras.

- > Create and generate up to 7 channels of video inserts, including images, advertising videos, slideshows and timing inserts (start list, standings, competitor information, etc.).

On the output side, this information can be sent to :

- > A giant LED panel with the BlackBox over an Ethernet network or HDMI. You can display a camera with graphics and logos, create a timing scenario in the colors of your competition, or display only slideshows of advertisements. It's up to you!

- > Pro Video Clips. The participant is filmed during the race with the cameras.

The software takes care of recording the participant, adding the programmed graphic overlays (logos, time, first-name-name, ranking, etc.), trimming the camera videos and sending the final edited video to Publish Equestre-Pro. The participant will be able to see his video next to his result on the live internet. All this handling is done AUTOMATICALLY, so no additional operator is needed to run the system.

- > WebTV-Pro. This output allows you to create a video stream and send it to the Internet. The stream can be viewed on Publish or on a dedicated web page. Automatically, you can film your competitions and broadcast the results, showing the landscape for example.

### TECHNICAL LISTING OF Video-Equestre-Pro

- 7 camera inputs to choose from: IP, HDMI, SDI, USB.
- 7 Media options: Fully customizable inlays with animations, slideshows, logos, slow-motion clips.
- 4 Output options: Blackbox, Clips-Pro, WebTV, PC monitor, non Vola giant screen (HDMI, SDI, VGA, DVI).
- Support for chroma keying (green background).
- Support for PIP and CROP (picture-in-picture, cutting out part of the image).
- Layer management for mixing inputs to outputs.
- Support for joystick control of Vola cameras (PTZ cameras).

With the help of an operator, you can move the cameras and follow a racing competitor. You then take on the role of director of your own TV channel.

## Video panels

A dream in color,  
pixel-perfect!

From the small 1m x 0.5m panel to the large 16m x 9m panel, create a medium to suit your needs and budget. Your race rankings will be dynamic, and this new communication medium will be limited only by your imagination.

# Vidéo Pannels

## CONTROL THE ENTIRE DISPLAY SURFACE

Modules can be juxtaposed to create display panels to suit your needs. You'll benefit from a surface area ranging from 0.5 m<sup>2</sup> to 16 m<sup>2</sup> with a 4.8mm pitch and a resolution of 104 x 208 dots. Compose your own presentation of chronometric data: sizes and colors are customizable.

## COMMUNICATE

Display texts, logos and advertisements from your partners. Create slideshows that scroll continuously. During your races, you can display your timing data. Between races, the panel will be a promotional tool.

## CROSSING BORDERS

We've created the BlackBox for easy video streaming. Pass through a private network made up of switches, wifi, Ethernet or fiber bridges.

Modules per m<sup>2</sup> / Ref. VT9-204

Duo Modules offer / Ref. VT9-202

Package includes :

- 1 2000 x 500 mm display.
- BlackBox.
- Power cable + 10m ethernet cable.
- Scoreboard-Pro software with USB dongle.

# Finish-Pro Video Camera

Stopping time has never been easier

Discover the complete Video Finish-Pro camera set and be at the cutting edge of technology. Stop time at the finish line for all competitions requiring finish-line filming.

## ALIGNMENT & SHARPNESS = CHILD'S PLAY

In 2D mode, you see the finish line as you see it. It's easy to superimpose the finish line on the camera's crosshairs. We've also integrated live viewing of the Wifi 2D stream on a smartphone.

## EXTREME LIGHT SENSITIVITY

High frame rates, low light levels and correct mobile proportions are difficult to reconcile. The Vidéo-Finish-Pro features a video sensor with greatly increased sensitivity. We've added a film-stretching algorithm during recording, which reduces acquisition speed while maintaining the right proportion of moving parts.

## LIMIT THE VOLUME YOU NEED TO TRANSPORT

We wanted a small camera. There's no need for you to take up too much space - modern technology makes power denser. Excluding the Lap-top, a Video-Finish-Pro fits into a 340x280x120mm case, including 20m of cable.

## Video-Finish-Pro 2D / Ref. VT10-12

- The pack includes :
- Camera with f:16mm lens and protective case.
  - Video-Finish-Pro software license (download).
  - Coded dongle.
  - 20m fiber link.
  - Wifi access point.
  - A user manual.

# Subscription system

Control your time: flexible subscriptions, simplified management

Constant access to the latest updates, transfer licenses and pay as you go. Enjoy an optimal timing experience without administrative hassle.

## SUBSCRIPTIONS

### CONSTANT ACCESS TO THE LATEST UPDATES

With our subscription system, customers benefit from uninterrupted access to the latest patches, additions and enhancements to our timing and broadcast software. This feature ensures that our customers always have the latest and best tools for their timing needs.

### SIMPLIFIED SUPPORT

Our support process is now streamlined to offer fast and efficient assistance to our customers. Our team is available to answer any questions or concerns, ensuring a smooth, hassle-free experience for our subscribers.

### FLEXIBLE LICENSE

This subscription model allows customers to choose a license tailored to their specific needs. You only pay for the period you have subscribed to our software and for the number of contests you publish, offering optimum flexibility and cost-effectiveness. The price of access to our suite has been lowered, making our technology more accessible than ever. This competitive pricing reflects our commitment to delivering exceptional value to our customers, while giving them a competitive edge in the marketplace.

## VOLA BOARD

### SUBSCRIPTION TRACKING

From Vola Board, customers can now easily track their subscriptions to installed Vola software. View subscription details, including end dates, for seamless management of your software usage.

### LICENSE TRANSFER

The Vola Board platform makes it easy to transfer licenses from one account to another. Whether for internal reorganization or sharing licenses between users, you have total control over your license management.

### ACCESS TO DIFFERENT SOFTWARE VERSIONS

The B2T platform makes it easy to transfer licenses between your protection keys. If you work with several timekeepers, you can restrict their access to VOLA Board and manage their licenses and payments from your web interface. This gives you total control over your license management.

For more information on the subscription system, visit our knowledge base on the [vola.fr](http://vola.fr) website in the Timing section.

# TIPS & TRICKS

WHAT YOU NEED TO KNOW

## RECOMMENDATIONS PRODUCTS

All our products have been tested and approved by the Vola team. These are professional products adapted to your needs and constraints. Our advanced knowledge of these products enables us to keep a close eye on your installations, so we can advise and troubleshoot as effectively as possible.

## A DONGLE, WHAT IS IT?

The dongle looks like a USB key, but... no, it's not! The dongle is a software security device. It contains the license key for your software, enabling you to use it. The dongle can be interchanged on another computer (which is correctly configured), if you encounter a problem with your main computer. It will then unlock the software on the spare computer.

## SOFTWARE CONFIGURATIONS

Layout configurations and scenarios can be saved and restored in our software.

Once you've completed your customizations, save them on an independent medium (USB key, hard disk, e-mail). In this way, you can be sure of finding your work in the event of breakage on the timing PC or character generator.

- Your display panel layout,
- Your edit sheet layout,
- Your specific category table.

Think about it before it's too late.

## CUSTOMER SERVICE

A problem, a repair?

Download the after-sales service form using the QR Code below or go to <http://www.vola.fr/en/timing/catalogue>

## VERSION NUMBERS

⚠ VOLA is constantly upgrading its to bring you the best-performing quality products.

VERSION X.Y.ZZ

For the rest of the software to work (Chrono + Display + Live + Timestamp + Video) X and Y must be identical.

[View version history](#)

## NOS OPTIONS « ULTRA-CONSEILLÉES »

### THE MANUAL CONTACTOR

The manual contactor will be useful for the jury to manage time stops and restarts during events. For timing convenience, we recommend that you wire the hand switch to the stopwatch and give it to the jury next to you.

### MANUAL CONTACTOR DOUBLING BOX

Timing impulses are generally transmitted by radio. In the event of interference, these impulses may not reach the stopwatch. The doubling box allows you to apply a manual impulse in the event of a problem. It can be connected to the Timy via the multi-spindle socket.

### IT SECURITY

The often hostile environment of competition stadiums does not always guarantee electrical stability. Chrono booths must therefore be equipped with inverters. As video generators are extremely demanding in terms of power supply, inverters are highly recommended to avoid any unpleasant surprises. This option is available for future installations.

## CABLE TIPS

Cables are central to any installation. They enable the various devices to be connected to each other in a sound manner. Whether serial, Ethernet, power or banana cables:

- Their condition must be checked regularly,
- They must be stored correctly: untangled, in a dry place and preferably in the open air,
- They must not be bent excessively: bending a cable beyond its maximum bending radius irreversibly damages the cable,
- Cables become more fragile in the cold. Be careful when handling them.

## IMPORTS / EXPORTS

Import your competitors and their points, then export the results for homologation. Equestre-Pro supports the following formats:

	Import	Export XML
FEI	yes	yes
FFE	yes	yes
SIF	yes	yes

## SUPER-USEFUL LINKS

French Riding Federation <https://www.ffe.com>  
 French Equestrian Society <https://www.shf.eu>  
 SHF Video <https://shf-video.com>  
 International Equestrian Federation <https://www.fei.org>

## TRAINING

Like all sports, you have to train to progress. You have to get involved and immerse yourself in the equipment to learn how to handle it. It's not something you're born with. As you use the equipment, you'll quickly gain experience and improve your performance. But don't lose your touch in the off-season - stay connected and active!

## BATTERIES

Timing devices can be powered by batteries or rechargeable batteries. The management of these devices is different.

### FOR BATTERIES :

- Batteries must be checked before timing.
- Always have spare batteries available.
- If the device is not to be used for a long period, remove the batteries before storing.
- Batteries must be fully charged before timing.
- The device must never be stored with discharged batteries.
- If the device is not to be used for a long period (e.g. summer season), charge the batteries before storing the device.
- It is advisable to charge the batteries every 4 months if the device is not in use.

## THE KNOWLEDGE KNOWLEDGE BASE

Log on to [vola.fr](http://vola.fr), Timing section, and click on «Knowledge Base». Discover a wide range of articles on software and hardware.

From learning to perfecting, this knowledge base is designed to provide you with the keys to success.

Can't find an item matching your search? Send an e-mail to [vola@vola.fr](mailto:vola@vola.fr) and we'll get back to you as soon as possible! Stay tuned :)

Vola now offers a new subscription-based billing system. The new system can be adapted to meet the needs of as many customers as possible, and works as follows:

- 1 month
- 6 months
- 12 months
- monthly or prepaid.

## SOFTWARE

# Others Suites

## A History of Software...

**1985**

Creation of the company Soft Control develops its own timing software. The company works closely with Vola to develop software that facilitates snow tests.

**2003**

Vola takes over Soft Control's timing business. The two divisions, SPORT and TIMING, share the same entity. New software is developed to meet strong demand. Vola expands into other sectors such as automotive, equestrian and cycling.

**2012**

Faced with the rise of Live Streaming and digital in the broadcast sense, Vola decided to extend its skills and move into video. Software for live broadcasting and video clip creation is born.

**2020**

Vola software is used all over the world and in a wide range of sports: motor racing (circuit racing and rallying), karting, horse-riding, winter sports and even robotics and camel racing! The Timing Division is a team of enthusiasts, always on the lookout for new challenges.

**2024**

Vola now offers a new subscription billing system. The system can be adapted to suit a wide range of customers, and operates as follows: 1 month, 6 months or 12 months, monthly or prepaid.

### Msports-Pro

MSport-Pro is a multi-functional timing software that allows you to time different race formats without being tied to any regulations. linked to any regulations.

### SkiAlp-Pro - SkiNordic-Pro

Winter» software allows you to time and broadcast live all Alpine & Nordic ski, snowboard, telemark and speed ski races.

### Circuit-Pro

Circuit-Pro is professional timing software developed for circuit racing and lap-by-lap racing.

### Scoreboard-Pro

Scoreboard-Pro is an easy-to-use software package for sending timing information, text and video to LED display panels.
